34MM MODULAR SOLID SURFACING

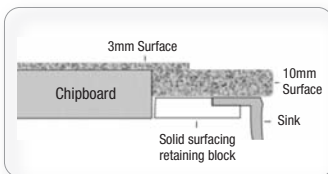

SMARTSTONE

Aspire to Smartstone, a practical and affordable solid surfacing with extraordinary looks and inconspicuous seams. Smartstone mirrors all of the design and durability characteristics of traditional solid surfacing, but with a modular advantage for immediate installation.

With its practical 3mm acrylic surface, Smartstone engenders a sculptured stone landscape that's ultra-hygienic and easy to clean. Smartstone looks particularly striking when installed with matching vertical elements, avoiding the maintenance problems of traditional tiling.

Smartstone is available "off the shelf" in worksurface, splashback and upstand for a total look and hygienic low maintenance finish.

SMARTSTONE IN-LINE*

Smartstone's new modular In-Line features a useful recessed drainer formed out of 10mm acrylic, avoiding spillage

around the sink area. Choose from two conveniently factory fitted stainless steel sink options from our fabulous range by **The 1810 Company** to complete your undermount solution.

In-Line can be incorporated in to any surface run with standard inconspicuous seams.
